

Interview of Thomas Clinton – 8/30/00

NTSB Interview - w/ Cliff Zimmerman NTSB
Chris Payne - OPS & Robert Rojas - El Paso
Thomas G. Clinton on 8/30/00 @ 1 PM

Manager - operations - Jal Complex

Responsibilities - manage operations of 25 employees
- No recollection of internal corrosion or any reports he has seen.
- Samples are taken from residue in the trap
and put in bottles. Richard Little often
is the person catching the pigeon the receiving trap.
Tom doesn't take the samples for delirium or marking.
An example would be D. Campbell or his staff taking
samples. Daryl Campbell - Lab superintendent or
Steve Brisbane - another from Lab group

Reports go to D. Campbell.

copy of reports to Tom & Env. group.

The samples are disposal
taken for hazardous material purposes to
clear the waste for disposal - talk to corrosion
personnel - Apparently not taken for corrosion purposes.

Drips are blowdown twice a month at a
minimum by the measurement technicians
in this area. A new Employee in Jerry Lloyd
Thames. Richard Posey has done it in the past.
Also Ronnie Wallis & Albert Grenada possible too.
