address:

[Redacted address]

position: operations specialist

Duties:

Run heavy equipment

rigging program

measurement area (sic) loss training

52 papular miles to jail, NM

1110 El 1103 <sup>site #1 plant in jail</sup>

6stats @ Euvicce

202.887  
4288

1100 - Starts in Euvicce, N.M. LL  
1103 - Starts at Keystone Plant  
1110 - Starts at #1 Plant at JAI

(2)

Mostly solids in the traps and then

put samples in a fiberglass container =

→ from the pig trap in

14 99 some samples sent to Lab for analysis.

sample to superannui in a bottle. <sup>1999</sup> <sup>1999</sup> <sup>1999</sup>

→ Ask ~~John~~ <sup>John</sup> on Southern C. PR 5th of 10

In the old days - 1975 era - usually

pigging was the norm with

company pigging crews

doing the work

they blow down the pig trap to atmosphere

How far over open air the driver has to

the 4" ft drum <sup>100</sup> feet <sup>100</sup> feet <sup>100</sup> feet

the drip tank. RL

Very little liquid comes out of the

drip tank. a sample also taken = 1999 =

black heavy sample with solids. RL

HAVE NEVER BEEN PRESENT FOR  
CLEANING OF TANK, BUT HAVE BLOWN  
DRIP ONCE A WEEK. RL

5000 lbs of pig  
sample of pig

③

they traced some trap water  
to clean the 2" line to

be sure it was open to  
empty the trap. RL

Water from his black book:

1/27/99 - 1103 pigged record of  
10/25/99 400 - 26" 55 gal solids

2/2/99 - 1110 pigged  
2/9/99 - 1110 pigged  
also to 100 ft depth, 22" 1100 pigged  
copy records from his black book only!

The pigging trouble was more  
records of every run it  
is involved in. March 2000 - 1103

May 22/2000 - pigged 1103 - Clean  
as slots

lots of a little trouble in this area - by  
they've killed on last night - another road  
today?

they ran pigs again to clear through  
clean & No Solids found in 1110 on 2/27/28  
RL

ON ONE OCCASION WE PUT HOT  
WATER IN THE DRIP TO CLEAN IT  
THEN WE DEPOSED OF THAT WATER  
IN ABOVE GROUND DRAIN TANK. RL

part of June

OVERSIZE PIGS WERE RAN  
ON 1110 - 1100 - 1103 10/26/27/28/2000  
RL
